Current Affiliation

School of Aeronautics, Universidad Politécnica de Madrid.
Postdoc, supervised by Prof. Javier Jiménez.

2026.01 – Present

Education

College of Engineering, Peking University.
Ph.D. in *Fluid Mechanics*, supervised by Prof. Jianjun Tao.

2020.09 – 2025.07

School of Mechanical Engineering, Tianjin University.
B.Eng. in *Ocean Engineering* (with distinction).

2016.09 – 2020.07

Dept. of Mechanical Engineering, Massachusetts Institute of Technology.
Visiting Student in *Ocean Engineering*, supervised by Dr. Yuming Liu.

2020.01 – 2020.07

Research Interest

My primary research is dedicated to **Turbulence & Transition (T^2)**, exploring the underlying physical mechanism with dynamical system approaches, brute-force DNS, experimental data, and machine learning tools.

Publications

* denotes the corresponding author.

Journal Articles

- [4] **J. Guan***, H. Hu, Y. Ren*, M. S. Triantafyllou, and D. Fan*, “Turbulence physics governs a scaling law for the machine-learning predictability ceiling in chaotic flow,” *arXiv.2606.21538*, 2026. [🔗 Link](#).

Academic Service

- Co-founder of Intelligent and Bio-inspired Mechanics Seminar (IBiM). 2020 – Present
- Reviewer for *Physics of Fluids*.

Honors & Awards

- The Third-prize Scholarship, Peking University. 2022,2021
- Excellent Scientific Research Prize, Peking University. 2021
- **Top Ten Outstanding Youth of School of Civil Engineering (0.28%), Tianjin Univeristy. 2019**
- **National Endeavor Scholarship, Ministry of Education of China 2018**
